

STUDENT VETERANS &

COMBAT VETERANS NEEDED!

What: We are conducting a study to determine the effect of scents and memory on presence within virtual environments.

Why: Scents are currently being used in conjunction with virtual reality to assist treatment of anxiety and stressor-related disorders. This study will explore whether scents and memory influence how much people feel they are “really there” when engaged with a virtual environment.

SONA Credit: SONA credits will be awarded for participation in this study. Approximate duration of participation is 1.5 Hours. Nonstudents are eligible for a \$20.00 gift card.

WANT TO PARTICIPATE?

If you are a veteran, student-veteran, or combat-veteran, ages 18+, and are interested in participating, please scan the QR code or contact Benson Munyan at:

Email: benson.munyan@knights.ucf.edu

Phone: 407-823-3910

Study Location: UCF RESTORES, Psychology Room 132
