CYBERSECURITY AWARENESS

WHAT IS CYBERSECURITY

Cybersecurity is the practice of protecting computers, networks, and data.

?

How do you use the Internet?

Have you ever had your identity stolen?

Do you have antivirus on your computer and update it on a regular basis?

!

Many scammers target people ages 55 and older via emails, websites, donations, online services, buyer's clubs, health insurance, prescriptions, and health care.

IDENTITY THEFT

Identity theft :

The illegal use of someone else's personal information to obtain money or credit.

Tips

- Choose a strong password.
- Don't use the same password twice.
- Do not reveal personal information online.
- Avoid opening attachments, links, or email messages from unknown senders.
- If making online payments, ensure the business is legitimate.
- Check your financial statements for unusual charges.

FRAUD & PHISHING

Fraud : the intentional misrepresentation of truth to convince you to part with something of value.

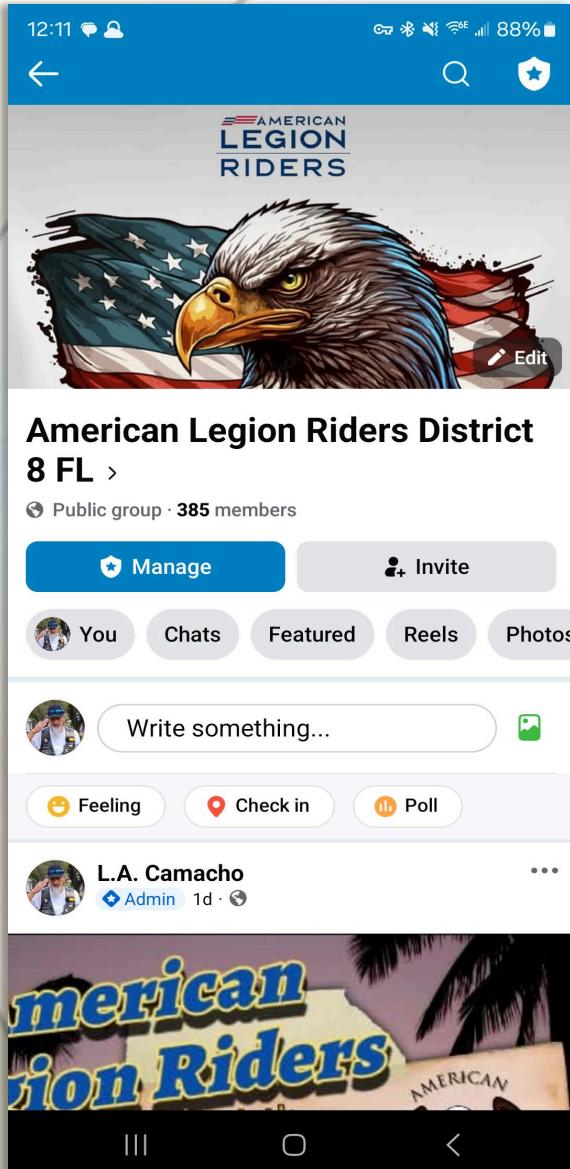

Phishing : a scam where the user is conned into revealing personal information that can be used illegally.

Tips

- Most organizations – don't ask for your personal information via email.
- Be cautious of attachments, links, or email messages from unknown senders
- Avoid accessing accounts online from a public computer or kiosk.
- Beware of “free” prizes, as they never are typically free.
- Avoid using the same password for everything.
- Update software, antivirus to protect your data.

Facebook Presence

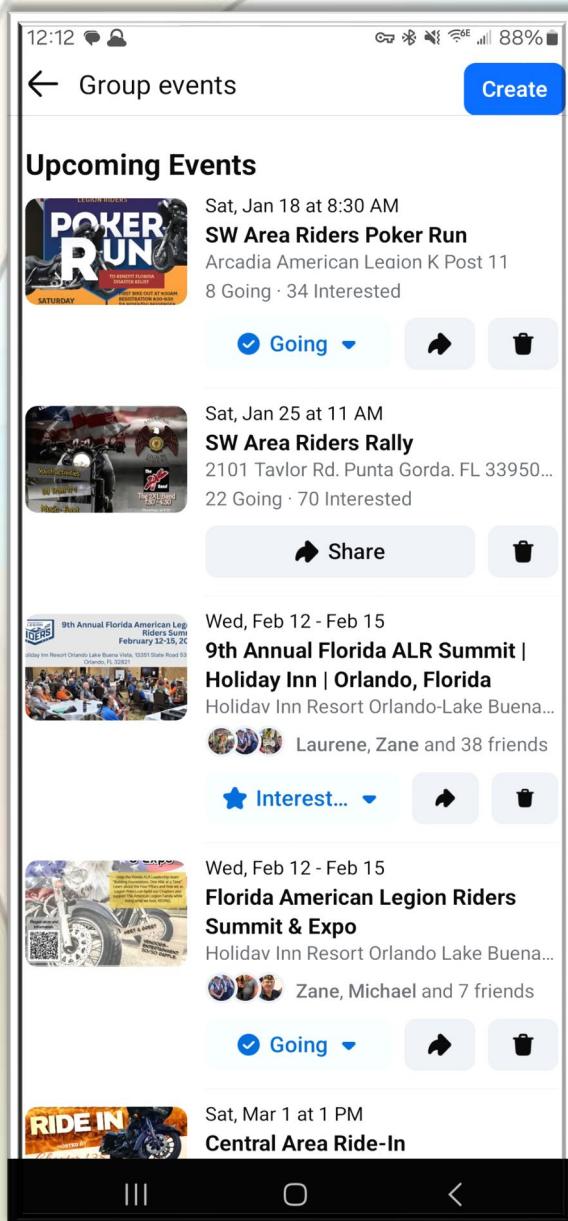

- Utilizing Social Media via a 'Public' Facebook Group can facilitate an easy access site for members.
- Offers the opportunity to reach out to potential donors and engage with the community.
- An easy and cost-effective way to spread awareness and build a support base.
